

## Engine Road, Gorebridge

For John Birnie (Developments) Ltd

This project of 9 terraced houses for sale is built on the site of the former Miner's Welfare Club in Gorebridge.

The terrace steps down a fairly steep street and has been carefully scaled with tall gables and corner windows forming a recurrent motif. Internal space standards are high and the external finishes have been designed to blend in with the adjacent new housing in the area.

Structural Engineer: Wren & Bell
